

Pole Vault

Pesky tent poles got you down? Now you can put your tent up without conventional rigid poles. AirZone tents use pneumatic poles that you inflate. AirZone tents look like any other tent but can inflate and deflate themselves in complete darkness, rain and wind. Tents can be inflated either by CO₂ cartridge, air tank, bicycle pump or electric battery compressor. Contact AirZone Products at 877-767-9663; www.airzonerecreation.com.
